

Pneumatic Bead and Spray Applicator for cartridges, sachets and pouches.

NEW to the market, the Cox Jetflow 3 is a multipurpose applicator for use with all conventional and sprayable sealants currently available.

The Cox Jetflow 3 provides the most flexible and easy-to-use spray and bead applicator, efficiently delivering low to high viscosity sealants in spray or bead form for a wide range of applications.

Jetflow 3™

Cartridge, Sachet and Pouch compatibility

Ergonomically designed

Lightweight and easy-to-use

Effortless spray and bead application

Easy change between bead and spray

Precise control with the unique built in-regulator

Quiet operation

Multiple user defined spray patterns

Smooth consistent flow of sealant

Manufactured in the UK

Jetflow 3™

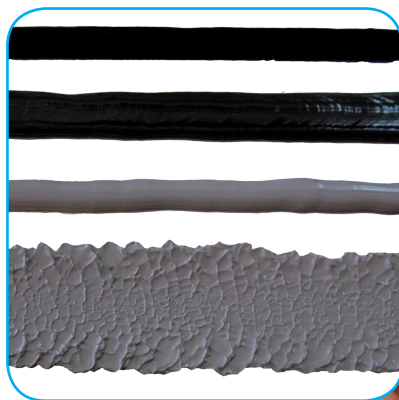

The NEW Jetflow 3 has been designed to match global customer demands for an easy-to-use and light to hold quality spray and bead applicator.

Jetflow 3 is the latest addition to Cox's renowned range of pneumatic sealant and adhesive applicators and the first Cox applicator to be designed with a control that changes the output from spray to bead at the head of the applicator in one easy twist.

SPRAY PATTERNS

With Jetflow 3's range of nozzles and the two flow controls, the operator can easily regulate the incoming air flow and pattern of spray the applicator delivers. There is no other applicator in the market that provides this level of flexibility and controlled delivery.

Jetflow 3 will provide users with an applicator capable of replicating spray patterns specified by the original vehicle manufacturer, automobile repairers and refinishers.

One Multi-Function Applicator to give you the ultimate choice

- Spray
- Bead
- Cartridge
- Sachet
- Pouch

SACHET OR CARTRIDGE - YOUR CHOICE

Jetflow 3 is truly flexible. With the optional conversion kit, you can easily change the configuration of the applicator from cartridge to sachet or sachet to cartridge. Now you don't have to have two specialist applicators. Jetflow 3 will do it all, spray, lay beads, and accept cartridges, sachets or pouches.

EVEN AND CONTROLLED BEADS

Because of Jetflow 3's ability to deliver highly viscous materials, it makes the applicator ideal for applying bonding sealant typically of the type used by vehicle windscreen fitters. As with the spray facility of the applicator, Jetflow 3 can deliver a wide range of bead thicknesses and material viscosities.

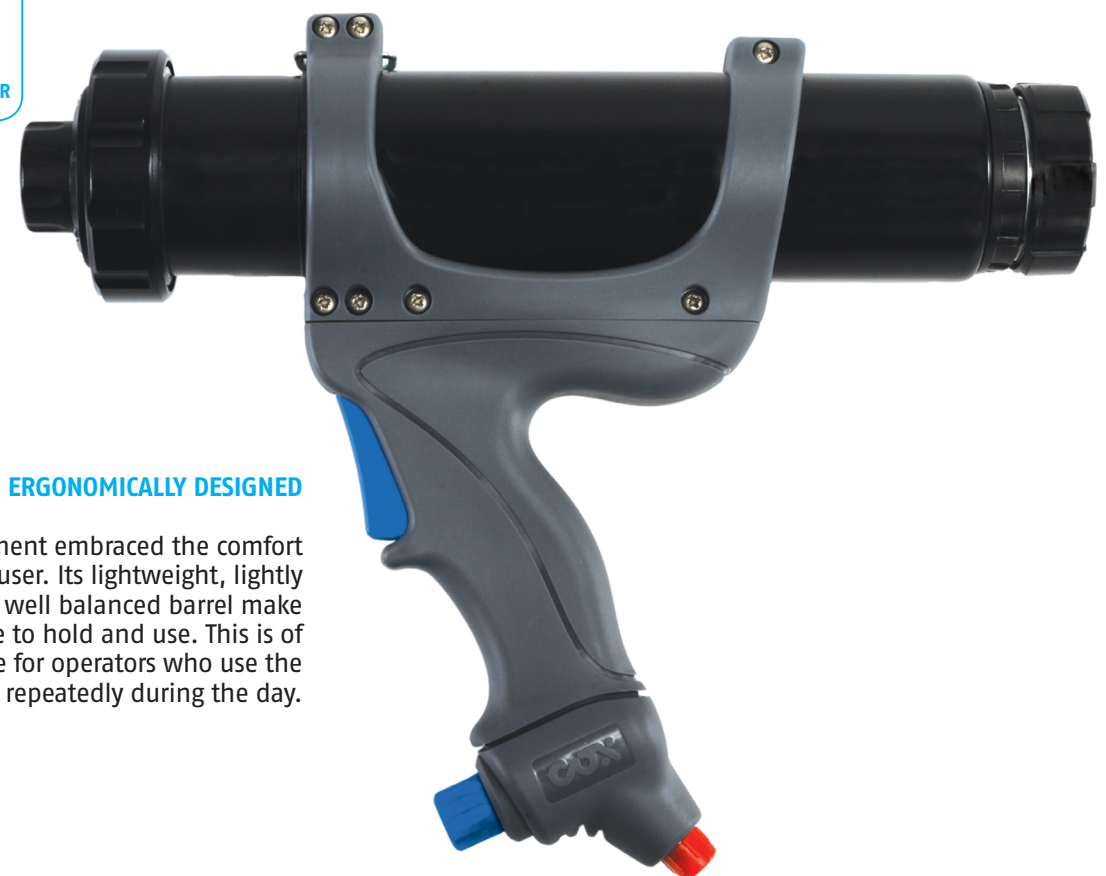

PRECISE CONTROL

Located conveniently on the front of the handle, the easy-to-use regulator provides operators with fingertip control of the airflow through the barrel. As a result, Jetflow 3 can effortlessly dispense a wide range of low to heavy viscosity materials contained in either cartridges, sachets or pouches.

QUIET BUT POWERFUL

Jetflow 3 is ideal for environments where production lines and refinishing operations take place. To aid productivity and improve operator comfort when used indoors, Jetflow 3 is fitted with a built-in silencer which lowers the noise level of the applicator to less than 70dB.

ERGONOMICALLY DESIGNED

Jetflow 3 development embraced the comfort requirements of the user. Its lightweight, lightly textured handle and well balanced barrel make Jetflow 3 a pleasure to hold and use. This is of particular importance for operators who use the applicator repeatedly during the day.
